Our Independence and Quality Control

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Public Accountants established by the Indonesian Institute of Certified Public Accountants, and have the required competencies and experience to conduct this assurance engagement.

Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the Subject Matter and related information, and applying analytical and other appropriate procedures.

Our limited assurance procedures included:

- Conducting interviews with key personnel to understand the process for collecting, collating and reporting the Subject Matter during the reporting period
- Undertaking review procedures on the First Annual Disclosure and on the documents of water recycling facilities construction to support the reasonableness of the data
- Comparing that the implementation of Subject Matter had been correctly applied in accordance with the Framework, on a sample basis, to check the validity of the data
- Undertaking virtual site visit to the newly constructed water recycling facilities in one slaughterhouse and one hatchery

Report No. 00173/2.1032/JL.0/01/0692-1/1/IV/2022 (continued)

Conclusion

Based on the limited assurance procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Subject Matter set out in the First Annual Disclosure for the period from 23 March 2021 to 23 March 2022 has not been reported and presented fairly, in all material respects, in accordance with the Criteria.
